Alpha Stem Cell Clinic Symposium

Event date:	Oct 8, 2020
Event type:	CIRM-Funded Conference
Event location:	Virtual Symposium
Registration:	Click here to register

Explore key issues in this developing field of stem cell and gene therapies becoming standard of care.

The CIRM-funded Alpha Stem Cell Clinics are a network for leading California medical centers. The Network specializes in delivering stem cell and gene therapy clinical trials to patients. The key to the Network's success is the ability to accelerate the delivery of treatments to patients through partnerships with patients, medical providers and clinical trial sponsors.

Every year, CIRM sponsors a public conference to educate, explore key issues in this developing field, and highlight results in the pursuit of stem cell and gene therapies becoming standard of care. This year on Thursday October 8, 2020, Sacramento's **UC Davis Health will host CIRM's 5th annual Alpha Stem Cell Clinic Network Symposium as an on-line virtual meeting**. Registrants will be sent a Zoom link about one week prior to the event. (Test your Zoom connection [here](#).)
